Creating a user journey is a quick way to help you and your team gain a deeper understanding of who you're designing for, aka the stakeholder in your project. The information you add here should be representative of the observations and research you've done about your users. \mathcal{P}

Phases gh-level steps your user needs to complish from start to finish	System and Camera Compatibility check	Open Web App	Capture or upload hand gestures	Sterile browsing of images
Steps tailed actions your user has to rform	Check Check Verify camera health health resolution	View how to use app Navigation controls of app	Start the web app to upload image Start the web app to upload image	Predict the action using model Compared to the action identified
Feelings What your user might be thinking and feeling at the moment	Surprised Curious	Aesthetic User Friendly	Happy Satisfied Helped	Analytical
	Anxiety Uncertain	Perplexed Annoyed	Scared Fear	Confused
Pain points bblems your user runs into	Feels unnecessary	User is new to Interface Hard to use app due to bad UI	More Bad image quality yields remember poor result	Incorrect mapping of gesture to image
Opportunities otential improvements or hancements to the experience	Small Convert to procedure to avoid overhead Convert to background process check	Better onboarding process	Easier navigation between the available modes	Easier Easier method to comprehend comprehend actions actions
